

Our Schools

For the first time in our recollection the term of our High Schools are to be curtailed on account of an alleged shortage of funds. It is contended by school authorities that the apportionment of the special fund for the accredited high schools will be smaller this year on account of an increase in such schools in the State, and therefore Appomattox High Schools will lose \$3,000, which has been coming from this special fund.

Our teachers and scholars are greatly disappointed, especially is this true of the candidates for graduation this year. It is believed that the high schools of this town and Pamplin will be able to complete the term by some means to be devised by the school authorities and patrons.

The Parent Teachers Association is busy on the job, and those who really appreciate the importance of our great school will gladly help out in this emergency.

We are confidently expecting help from the town council, the Board of Supervisors and private citizens to carry through the important schools at Appomattox and Pamplin.

The order has been issued to close the schools two weeks before the end of the term.

The matter is of the greatest importance to the towns and the county and friends of the children and the schools must not fail in this hour of emergency.

STONEWALL

Don't forget to see "Always in Trouble" at Stonewall school Friday night, May 5. Come prepared to laugh.

Mrs. J. A. Stratton is visiting relatives in Lynchburg for two weeks.

Mrs. C. M. Stratton, Sr., Mr. and Mrs. B. D. Stratton and son, Jimmie, were shoppers in Lynchburg Tuesday.

Miss Verna Parriss fell at school last week and sustained internal injuries. She is improving and hopes to be out of bed soon.

Announcements have been recently received of the marriage of Miss Ruth Wilson, of Chicago, and Willie B. Taylor, son of Mrs. Taylor and late E. Taylor, of Appomattox County. Mr. Taylor expects to bring his bride to Appomattox during the summer.

Mr. and Mrs. Vaughan Taylor and sons, of Roanoke, were Sunday visitors of Mrs. Lela Taylor and family.

Supervisor S. E. Anderson is driving a new Chevrolet Landau.

Mrs. E. H. Carson and son, John, visited Mrs. Eddie Owen at Oakville, Sunday.

Friends of Andrew Johnson, who has been in hospital since February for an appendicitis operation, will be glad to hear that he is improving.

Rupture Shield Expert Here

E. J. Meinhardt, of Chicago, the well-known expert, will personally be at the Virginia Hotel, Lynchburg, Va., on Tuesday only, May 8th, from 9:00 A. M. to 5:00 P. M. Mr. Meinhardt says: "The Meinhardt Vacuum Shield" will not only repair the rupture perfectly, but contracts the opening in 10 days on the average. It is a new, scientific method of repair, usually giving the patient complete relief from the danger of strangulation of the rupture.

CAUTION—Do not expose yourself to the danger of wearing old tight-fitting trousers with unbroken, loose, hanging flaps which usually cause strangulation of the rupture. This often causes strangulation of the rupture, which usually results in sudden death.

It is also perfectly satisfactory to wear the Meinhardt Vacuum Shield. It is a new, scientific method of repair, usually giving the patient complete relief from the danger of strangulation of the rupture.

Only gentlemen are invited to call at this time. As special arrangements will be made for the ladies, they are not invited to call. NOTICE—Please do not write asking for literature or to be fitted by mail as this is impossible. Every case must be seen personally. Therefore, when this notice is given, it is given to you. If you do not wish to be fitted, please call for a free trial. If you do wish to be fitted, please call for a free trial. If you do wish to be fitted, please call for a free trial.

SEAT IN HOUSE OF LORDS IS EASY JOB

Can't Lose It, Anyway, So Nobody Attempts.

London.—The idea which is prevalent among many people that the house of lords is the usual type of legislative body made up of elderly gentlemen of title has been dispelled by Prof. Harold Laski in a recent discussion of the proposed reform of that body.

Few people are aware, for example, that a peer's seat in the house of lords can be taken from him as easily as his name, regardless of how little attention he may give it. As a result it is revealed that 412 members of the house have never spoken in debate. Indeed, the average attendance since 1918 has been 56, and only on six occasions since then have more than 250 of them voted in a division.

Few Prominent.

Only once in the last half century has a man achieved distinction in the house of lords who had not previously distinguished himself in the house of commons. This single exception was Lord Roseberry, which makes it felt to conclude that even he became eminent not because of his seat in the house of lords but rather in spite of it.

This seeming indifference of the peers to their prerogatives in the upper house is partly due to the formidable claim which they possess of their seats, as well as to the fact that these gentlemen are not clustered in the house of lords, but are scattered among the masses, as many as 200, but often prominent figures in the heat and stress of daily human conflict.

It should be remembered that of them own 8,000,000 acres in Great Britain and Ireland, and represent the landed interest. Two hundred and seventy-five are directors of business organizations. Of these latter, 73 are directors of insurance companies, 66 of different banks, 79 directors of corporations listed as finance and investment, 64 directors of railway companies, 49 directors of engineering and shipping companies, while many more are officials of companies engaged in gold mining.

Propose Changes.

Referring to the proposals of Lord Cave and Lord Birkenhead for the reform of the house of lords, Lord Gorell recently declared that he remembered nothing more lament even for members of the house of lords. He declared the aim of setting up the house of lords as an unalterable permanent body, saying that there could be no justification for a chamber which could come into being and cease to exist with an elected chamber.

Lord Gorell took the occasion to issue a warning that the house of lords should not be allowed to become a mere appendage to the house of commons. He said that the house of lords should be a body of men who were not only distinguished by their position but also by their character and their achievements.

"Tiger" Gets New Car, but Cash Is Refused

Paris, France.—Georges Clemenceau, the grand old man of Gaul, who uses an automobile instead of the train for traveling about France, tried to buy a new car the other day and could not.

For several years the Tiger had traveled about in a big old car. He decided it was about time to get a new model and went to the sales office to see how much he would be allowed on the old machine.

"Monsieur le President," the sales manager said, "France owes you too much. Let me pay my part of it today." And, on being refused to accept a son from the Tiger.

Clemenceau, on returning to his apartment, sent a check for 10,000 francs—\$400—to the automobile plant. He said that the check was for the car, but that he was not sure of the circumstances were the most needed.

World Shortage of Oorang-Outangs Seen

Nice, France.—Hunters back from Central Africa with a collection of 60 chattering orang-outangs, destined to play an important role in the future juvenile operations by Doctor Verocet, and other specialists, said that within two years there would be a shortage of orang-outangs. The demands of rejuvenation surgeons have resulted in multiplying the forests of animals miles apart from four to eight years. Efforts will be made to increase the production in captivity.

Father of 31

Neustadt, Germany.—Robert Fehrenbach became a father for the thirty-first time. His present wife is his third and he has 28 children living.

BIGGEST AIRSHIP UP AT AUCTION

Awaits Highest Bidder at Zepplin Works.

Friedrichshafen, Germany.—For the first time in history a dirigible is to be sold at auction.

The LZ 127, described as the mightiest airship ever constructed, is on the open market awaiting the highest bidder. It was originally designed by the Zepplin Construction company for commercial flights between Spain and Argentina, but the South American government failed to provide an adequate hangar and landing field, so the plan was abandoned.

As soon as a purchaser is found the Zepplin company will start building an LZ 128.

Fervent activity prevails in the three large hangars of the Zepplin company on Lake Constance, in which 200 workmen and engineers are striving against time to launch the LZ 127 by the end of May.

With a capacity of 344,487 cubic feet and a length of 770 feet, the ship surpasses in size an ordinary ocean liner and is bigger by half than the Los Angeles.

Five Maybach motors of 600 horse power each are being mounted in their special gondolas. Their combined energy will insure a speed of seventy-nine miles an hour. As inflation gas for floating the Zepplin pure hydrogen will be employed and both gasoline and a hydrocarbonated gas approximately as light as air, are intended as motor fuel.

The aerial globe will be manned by a crew of twenty-six on its trial flight and by thirty-six on voyages to other continents.

The commander will be Dr. Hugo Eckener, who also took the LZ 111, later the Los Angeles, to America.

Comfortable accommodations are provided for twenty passengers. The ship can carry 100 persons, but passengers are not a paying factor for a large dirigible as yet. It derives its profit mainly from mail and freight.

Light Waves Preserve Leaf of Bread 8 Days

Cincinnati.—The contribution of science to the baking of a more perfect loaf of bread was discussed by the Ohio Academy of Science recently in its analysis of the ways scientific investigation has aided industry and health.

Bacteria in the enzymes used in making bread are now destroyed by exposing them to light waves of a certain length, enabling the production of bread which will remain unspoiled and sweet after eight days, according to President Hermon.

The University of Cincinnati held the academy. The process was perfect in the research laboratory of the University of Cincinnati.

Mr. Schneiderman, light perfect had also been successfully applied to destroy the bacteria in orange juice, milk and other foodstuffs.

"Leathernecks" Hunt for Original Version of Song

Washington.—The marine corps has begun a search for the original of its song that ends with "If the army and the navy ever look on heaven's cease they will find the arrears are guarded by the United States marines."

Gen. John A. Lejeune, commandant, has requested Maj. J. C. Fegan to obtain the three original stanzas of the song which has been sung by the leathernecks in many climes, and known by all students of native dities.

The reason for the request is that during the past three decades many parodies have been written and many verses of an unflattering tone have been inserted.

Diary Brings \$52,000

London.—Dr. A. S. W. Rosebach of Philadelphia paid \$10,500 (\$32,000) at auction for the Ward Diary, dated 1829 to 1881.

The diary was kept by the clear of Stratford-on-Avon and is valuable for its references to Shakespeare.

Catnip Lures Hugs

Cougars to Death

Victoria, B. C.—Catnip is being used to lure British Columbia into the major crops without materially affecting the output of the latter. It is used as a lure for cougars and, according to M. E. Jack, son, chairman of the game conservation board, it is proving effective.

The cougar is just a few in many ways, and like every other pussy is very fond of catnip. Mr. Jackson said, "It is a universal catnip is literally sprinkled around when cougar traps are set, and is proving a worthy bait."
